# Dr Hon Fernando CHEUNG Chiu-hung 張超雄議員

Geographical Constituency – New Territories East Labour Party

### **Membership in Environmental-related Committees:**

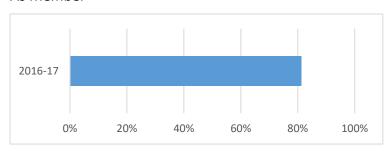

- Panel on Environmental Affairs
- Bills Committee on Waste Disposal (Charging for Municipal Solid Waste) (Amendment) Bill 2018
- Subcommittee on Air Pollution Control (Vehicle Design Standards) (Emission)
   (Amendment) Regulation 2017

## **Voting Record:**

8 December 2016: Motion Moved by Hon Chan Han-Pan on "Updating the	
Hong Kong Planning Standards and Guidelines and Increasing Community	Abstain
Facilities to Enhance Living Environment" as Amended by Hon Alice Mak,	Abstaili
Ir Dr Hon Lo Wai-Kwok, Hon Frankie Yick and Hon Andrew Wan	
1 June 2017: Motion on "Promoting 'Hong Kong People Using Hong Kong	Voc
Water' and Protecting Local Resources"	Yes
5 July 2017: Proposed Resolution Moved by Secretary for the Environment	
under the Product Eco-Responsibility Ordinance and the Interpretation	Yes
and General Clauses Ordinance	
16 November 2017: Proposed Resolution under the Energy Efficiency	Val
(Labelling of Products) Ordinance	Yes
31 January 2018: Protection of Endangered Species of Animals and Plants	
(Amendment) Bill 2017 - Third Reading	Yes
12 April 2018: Motion Moved by Hon Frankie Yick on "Promoting the	
Popularization of Electric Vehicles" as Amended by Hon Kenneth Leung,	No
Hon Charles Peter Mok, Ir Dr Hon Lo Wai-Kwok, Hon Yung Hoi-Yan, Hon	
Chan Hak-Kan and Hon Tanya Chan	

### **Panel on Environmental Affairs Attendance:**

## **Comments Made in Environmental-related Committees:**

Panel on Environmental Affairs

8. Dr Fernando CHEUNG expressed concern about the poor air quality in Hong Kong after the last Christmas holidays in 2016, with readings of PM2.5 in Tung Chung reaching 141 micrograms per cubic metre ("μg/m3"), almost six times the World Health Organization's safety limit of 25 μg/m3 and well above Hong Kong's limit of 75 μg/m3, while the World Air Quality Index had recorded as high as 196 μg/m3 in the territory. He observed that local and overseas experts/scientists, and the Hong Kong Observatory held different views as to whether the poor local air quality was caused by the northeast monsoon bringing the smog from northeast Mainland China to Hong Kong. Dr CHEUNG urged the Environment Protection Department ("EPD") to closely monitor local air quality forecasts and advanced warnings to better safeguard public health.  20170227 26. Dr Fernando CHEUNG supported reducing the FRT concession for electric private cars while maintaining the full waiver for electric commercial vehicles. Dr CHEUNG considered it reasonable to cap the FRT waiver for electric private cars as he observed that over 60% of electric private cars registered in Hong Kong in 2014-2015 were luxury sports EVs priced above \$600,000. Considering the substantial revenue forgone as a result of FRT exemption, it was unjustified to "subsidize" the purchase of luxury EVs through a full FRT waiver.  20170227 37. Mr CHU Hoi-dick and Dr Fernando CHEUNG considered that the Administration should step up its efforts in controlling the growth of private cars in Hong Kong.  Air they did not support the motion [to maintain the existing arrangement of waiving the first registration tax for electric	20472423

	20170227	42. <b>Dr Fernando CHEUNG</b> and Mr LEUNG Kwok-hung said that	Air

	private cars], as they considered that the full FRT waiver had	
	been abused on the purchase of luxury EVs in the past.	
20170429	28. <b>Dr Fernando CHEUNG</b> pointed out that as electricity	Climate
	tariffs were related to the expenditure of the power	
	companies instead of permitted RoR, the drop of permitted	
	RoR would not bring about the reduction of future tariff. In	
	particular, the power companies had used to make excessive	
	investment to drive up the tariffs. As a result, the power	
	supply was highly reliable in Hong Kong, at the expense of the	
	environment and customers' affordability. To this end, he	
	suggested that a cap should be set on the reserve capacity of	
	both companies.	
20181126	30. <b>Dr Fernando CHEUNG</b> said that he supported the policy	Waste
	direction of implementing MSW charging to reduce waste and	
	relieve pressure on landfills. He considered that more	
	assistance should be given to people with special needs (such	
	as the elderly and people suffering from chronic illnesses)	
	who generated larger amounts of unavoidable waste	
	compared to the general population, so as to alleviate the	
	financial impact of MSW charging on those people.	
20181126	43. <b>Dr Fernando CHEUNG</b> considered that the Administration	Waste
	should comprehensively enhance the provision of resource	
	recovery facilities in the community to make it more	
	convenient for members of the public to practise waste	
	separation. Without this initiative, it would be difficult for	
	ordinary households to reduce the amount of waste they	
	disposed of and the MSW charge to be paid. In addition, he	
	opined that the Administration should implement new PRSs	
	on various product categories in tandem with the	
	introduction MSW charging, so that product manufacturers or	
	suppliers would be required to shoulder more responsibility	
	for reducing waste.	
20181126	52. <b>Dr Fernando CHEUNG</b> expressed concerns that it might be	Waste
	more difficult for disadvantaged groups and elderly persons	
	living alone or with another elderly person to change their	
	waste disposal habits; conflicts might arise between those	
	people and frontline enforcement officers due to	
	misunderstanding of the requirements under the proposed	

MSW charging scheme; and operators of residential care homes for the elderly might reduce the frequency of replacing used medical and personal care products in order to pay less MSW charge. He therefore suggested that the Administration should enhance its support for the work of non-governmental organizations ("NGOs") in public education on MSW charging as well as waste reduction and recycling in general. SEN responded that the Administration would seek to collaborate with NGOs on public education.

Bills Committee on Waste Disposal (Charging for Municipal Solid Waste) (Amendment)
Bill 2018

20190218	1.	<b>Dr CHEUNG</b> was worried that the implementation of the proposed
		charging scheme would pose additional legal risks to those
		scavengers. He asked whether the Administration would render
		more support to them, such as providing space for storage of
		equipment (e.g. handcarts) and separation of recyclables from the
		waste stream.
20190430	2.	Dr CHEUNG urged the Administration to offer assistance to the
		needy to mitigate the financial impact of the proposed charging
		scheme. While the Administration had proposed increasing the
		standard rates under the Comprehensive Social Security
		Assistance ("CSSA") Scheme by \$10 per person per month for the
		purpose, he questioned the effectiveness of this measure, given
		that the proposed extra payment might not be used directly on the
		purchase of DBs and DLs. He suggested the following measures
		instead:
		(a) granting exemption to recipients of various financial assistance
		schemes, such as the CSSA Scheme, Old Age Living Allowance and
		schemes administered by the Working Family and Student
		Financial Assistance Agency, who had already undergone relevant
		financial tests; or
		(b) providing free DBs and DLs to the above people free of charge.
20190507	3.	Dr CHEUNG expressed concern that scavengers who collected
		recyclables might commit offences under the Bill inadvertently. He
		called on the Administration to formulate comprehensive policies
		to facilitate the work of scavengers after the implementation of the
		proposed charging scheme (if the Bill was passed).

#### 20191218 4.

- 4. As there were about 3 000 public refuse collection points ("RCPs") in Hong Kong and only a small proportion of them were staffed with attendants, **Dr CHEUNG** queried whether FEHD would have sufficient manpower to enforce the proposed MSW charging scheme (if the Bill was passed) and reject non-compliant waste ("NCW") at RCPs. He also expressed concern that frontline cleaning workers' workload would be increased significantly due to the implementation of the proposed MSW charging scheme, and that they might commit offences under the Bill inadvertently when handling NCW.
- 5. Dr CHEUNG was worried that enforcement actions under the risk-based approach would be mostly triggered in old buildings without centralized arrangements for coping with MSW charging, and therefore disadvantaged groups residing in those buildings would bear the brunt of the impact of the proposed MSW charging scheme.
