# Dr Hon Junius HO Kwan-yiu, JP 何君堯議員

Geographical Constituency - New Territories West

## Membership in Environmental-related Committees:

- Panel on Environmental Affairs
- Bills Committee on Protection of Endangered Species of Animals and Plants (Amendment) Bill 2017
- Bills Committee on Waste Disposal (Charging for Municipal Solid Waste) (Amendment) Bill 2018
- Subcommittee on Air Pollution Control (Vehicle Design Standards) (Emission)
   (Amendment) Regulation 2017
- Subcommittee on Air Pollution Control (Volatile Organic Compounds) (Amendment)
   Regulation 2017
- Subcommittee on Country Parks (Designation) (Consolidation) (Amendment) Order
   2017
- Subcommittee on Marine Parks (Designation) (Amendment) Order 2016
- Subcommittee on Promotion of Recycling and Proper Disposal (Electrical Equipment and Electronic Equipment) (Amendment) Ordinance 2016 (Commencement) Notice 2017 and Product Eco-Responsibility (Regulated Electrical Equipment) Regulation
- Subcommittee to Study Issues Relating to the Development of Electric Vehicles

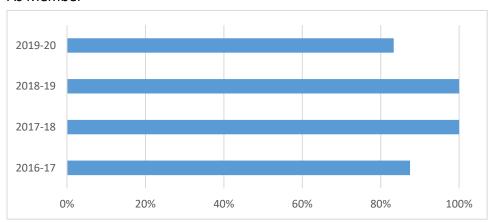

# **Voting Record:**

8 December 2016: Motion Moved by Hon Chan Han-Pan on "Updating the	
Hong Kong Planning Standards and Guidelines and Increasing Community	Yes
Facilities to Enhance Living Environment" as Amended by Hon Alice Mak,	163
Ir Dr Hon Lo Wai-Kwok, Hon Frankie Yick and Hon Andrew Wan	
1 June 2017: Motion on "Promoting 'Hong Kong People Using Hong Kong	
Water' and Protecting Local Resources"	
5 July 2017: Proposed Resolution Moved by Secretary for the Environment	
under the Product Eco-Responsibility Ordinance and the Interpretation	Yes
and General Clauses Ordinance	
16 November 2017: Proposed Resolution under the Energy Efficiency	
(Labelling of Products) Ordinance	
31 January 2018: Protection of Endangered Species of Animals and Plants	Voc
(Amendment) Bill 2017 - Third Reading	Yes

12 April 2018: Motion Moved by Hon Frankie Yick on "Promoting the Popularization of Electric Vehicles" as Amended by Hon Kenneth Leung, Hon Charles Peter Mok, Ir Dr Hon Lo Wai-Kwok, Hon Yung Hoi-Yan, Hon Chan Hak-Kan and Hon Tanya Chan

#### Panel on Environmental Affairs Attendance:

#### As Member

### **Comments Made in Environmental-related Committees:**

Panel on Environmental Affairs

20170123	16. <b>Dr Junius HO</b> suggested providing support to encourage	Climate
	installation of PV systems at rooftops of village houses.	
20170227	22. <b>Dr Junius HO</b> , on the other hand, expressed concern	Air
	whether the existing or revised FRT waiver might amount to	
	an advantage to EV manufacturers and vendors, and lead to	
	unfair competition in the automotive industry.	
20170227	37. <b>Dr Junius HO</b> enquired if the Administration would	Air
	consider introducing a quota system to limit the size of the	
	local private car fleet.	
20170522	30. <b>Dr Junius HO</b> noted that large quantities of marine refuse	Waste
	had been washed up onto a number of local beaches,	
	including Lung Kwu Tan and Butterfly Beach in Tuen Mun, in	
	particular during typhoon seasons and the cleaning up work	
	was not satisfactory. He enquired whether the Administration	
	would consider strengthening its cooperation with the	
	community, such as setting up a concern group with	
	representatives from non-governmental organizations	
	("NGOs"), District Councils ("DCs"), schools, the Leisure and	
	Cultural Services Department ("LCSD") and AFCD for	
	organizing beach cleanup activities and competitions, etc. He	

	also suggested the Administration employ other support	
	facilities (e.g. sand sieves) to clean up refuse on beaches.	
20170529	19. <b>Dr Junius HO</b> , Mr YIU Chung-yim and Dr Elizabeth QUAT	Waste
	enquired about the possible difficulties encountered in taking	
	enforcement actions in future against non-compliances with	
	the requirements under MSW charging, and the relevant	
	enforcement measures to be taken by the Administration to	
	overcome those difficulties.	
20171012	12a. Measures to assist the recycling industry to meet the	Waste
	Mainland's tightened requirements for import recyclables: In	
	connection with the Implementation Plan on Advancing	
	Reform of the Administration System on Import of Solid	
	Wastes through Prohibiting Import of Foreign Rubbish	
	promulgated in July 2017 whereby the Mainland authorities	
	would phase in more stringent requirements on the import of	
	recyclables, Dr CHIANG Lai-wan, Dr Elizabeth QUAT and $\textbf{Dr}$	
	Junius HO urged that the Administration should explore	
	measures to assist the recycling industry as local recyclables	
	might not have sufficient market outlets if other countries	
	were also tightening up their national standards for imported	
	waste in future. <b>Dr HO</b> suggested that the Administration	
	should make use of modern technology to explore feasible	
	measures to assist the industry, such that recyclables	
	recovered from the community could be consumed locally;	
20171012	12c. Development of renewable energy ("RE"): Mr HUI Chi-	Climate
	fung, Mr CHAN Hak-kan and <b>Dr Junius HO</b> proposed to discuss	
	details of the implementation of the Feed-in Tariff ("FiT")	
	scheme to be introduced in the next regulatory period of the	
	Scheme of Control Agreements, including the setting of FiT	
	rate(s) and measures to encourage the private sector and the	
	community to consider investing in distributed RE.	
20171030	9. <b>Dr Junius HO</b> considered that the Administration should	Climate
	promote the installation of PV devices on rooftops of village	
	houses in the New Territories and explore ways to assist	
	owners of village houses in such installation. He requested the	
	Administration to seek clarification on the size specifications	
	for erection of such facilities under the Buildings Ordinance	
	(Cap. 123) and to consider launching a pilot scheme in	

	selected villages in order to assess its effectiveness.	
20171030	42. <b>Dr Junius HO</b> then moved the following motion: "This	Climate
	Panel urges government departments to strengthen	
	coordination in vigorously promoting the use of solar energy	
	for electricity generation in small houses in the New	
	Territories, in particular, make good use of solar panel	
	installations, which is the seventh of the 19 "household	
	amenity features" currently identified by the Development	
	Bureau, and clarify the specifications for installing them,	
	especially those with elevated structures at a height of more	
	than 2.5 metres and covering an area of more than 35 square	
	metres. In addition, the Government should first seek to	
	provide a sample or model of the installations, with a view to	
	further encouraging the community to consider investing in	
	distributed renewable energy generation equipment."	
20171127	23. Mr CHAN Chi-chuen pointed out that the recyclables	Waste
	exported from Hong Kong to the Mainland for recycling	
	should not be regarded as "foreign rubbish", since according	
	to the Basic Law, the Hong Kong Special Administrative Region	
	was an inalienable part of the People's Republic of China. <b>Dr</b>	
	Junius HO said that he had relayed similar view to MEP for	
	consideration regarding the applicability of the	
	["Implementation Plan on Advancing Reform of the	
	Administration System on Import of Solid Wastes through	
20171127	Prohibiting Import of Foreign Rubbish"] to Hong Kong.  33. <b>Dr Junius HO</b> welcomed the Government's efforts in	Waste
201/112/	assisting the local recycling industry to upgrade their	vvaste
	machines and equipment so as to meet the Mainland's import	
	requirements. He however considered that Hong Kong should	
	devise a long term plan to re-use its locally-generated	
	recyclables. Regarding the Administration's proposed	
	measure to incubate a local manufacturing industry using	
	recycled materials, he suggested that the Government should	
	take the lead to establish a waste paper recycling plant to	
	provide a business model to encourage the private sector to	
	start business in this area, and explore possible privatisation	
	of this recycling plant in future. He added that this was	
	consistent with the Administration's approach for disposal	

	and processing of waste including sewage, sludge, electrical	
	waste, glass tiles and food waste.	
20171219	10. <b>Dr Junius HO</b> called on the Administration to consider	Waste
	adopting more advanced technology to dispose of	
	unrecyclable waste, for example, through the use of plasma	
	gasification technology, the unrecyclable waste could	
	potentially turn to energy recovery. He further said that more	
	could be done in terms of tools and equipment to safeguard	
	the occupational safety and health of elderly waste collectors.	
	In this connection, he suggested that the Administration	
	should (a) subsidize the waste collectors to purchase	
	machines such as electric trolleys to facilitate their manual	
	handling work, and (b) provide sufficient work space for waste	
	collectors at refuse collection points through conducting	
	improvement works.	
20180326	18. <b>Dr Junius HO</b> asked how EPD and FEHD would strengthen	Waste
	coordination in handling fly-tipping activities at RCPs in rural	
	areas, and whether the Administration would consider	
	revamping the design of those RCPs to improve their	
	appearance and reduce environmental nuisance arising from	
	illegal dumping at the facilities.	
20180423	7. Mr WU Chi-wai and <b>Dr Junius HO</b> considered that the FiT	Climate
	Scheme had the potential to create a win-win situation in	
	which suppliers/contractors of RE systems and building	
	professionals would benefit from the business opportunities	
	created and owners of RE systems would save energy costs.	
20180423	12. To better protect the interest of FiT Scheme participants,	Climate
	in particular those who joined the Scheme closer to the expiry	
	of the post-2018 SCAs, Mr CHU Hoi-dick and <b>Dr Junius HO</b>	
	asked if the Administration would consider requiring the	
	power companies to purchase electricity generated from	
	each participating RE system for a fixed period of, say, 10	
	years.	
20180423	15. As solar energy equipment was one of the green and	Climate
	amenity facilities that were allowed to be installed in New	
	Territories exempted houses ("NTEHs") without seeking	
	permission from the Lands Department or the Buildings	
	Department, <b>Dr Junius HO</b> suggested the Administration	

	and/or the two power companies conduct pilot projects at					
	NTEHs at the initial stage of implementation of the FiT					
	Scheme, and share the experience of the successful pilot					
	projects to other potential FiT Scheme participants.					
20180423	16. Mr Tony TSE and <b>Dr Junius HO</b> opined that the					
	Administration should issue guidance notes on the legal					
	requirements involved and other related issues as early as					
	possible to ensure building safety and legal compliance by RE					
	developers in general.					
20180423	18. The Chairman and <b>Dr Junius HO</b> enquired if the	Climate				
	Administration had estimated the participation rates of the					
	FiT Scheme in CLP and HKE's service areas respectively and					
	the projected contribution from participating RE systems to					
	the local electricity demand.					
20180423	23. Mr LEUNG, Mr LAU and <b>Dr Junius HO</b> enquired whether	Climate				
	and when the Administration would relax the relevant					
	requirements with a view to promoting the development of					
	distributed RE.					
20180625	11. <b>Dr Junius HO</b> and Mr KWOK Wai-keung supported the	Air				
	implementation of [Cleaner Production Partnership					
	Programme] as they considered that Hong Kong had a duty to					
	contribute to the reduction of pollution in the Pearl River					
	Delta ("PRD") region.					
20180625	22. To assess whether [Cleaner Production Partnership	Air				
	Programme] was cost-efficient, <b>Dr Junius HO</b> sought					
	information on the estimated number of factories that might					
	benefit from the Programme, and the environmental benefits					
	brought by the approved/completed demonstration projects.					
20180625	38. <b>Dr Junius HO</b> , Mr Tony TSE and the Chairman considered	Air				
	that the Administration should step up its publicity efforts to					
	enhance public awareness of the Scheme and the IAQ					
	objectives, as well as public recognition of the IAQ					
	certification.					
20180625	41. As premises owners/management should bear the	Air				
	responsibility of maintaining a comfortable and hygienic					
	indoor environment for the occupants, Mr KWOK Wai-keung					
	and <b>Dr Junius HO</b> suggested that the Administration should					
	make it a compulsory requirement for all premises to meet a					

basic set of IAQ standards through legislative means, conduct random inspections for detecting and rectifying noncompliances, and require routine cleaning of MVAC systems by the relevant premises owners/management.  20180719  4. Dr Junius HO expressed support for the implementation of [the producer responsibility scheme on glass beverage containers] but queried the profitability of waste glass recycling businesses and whether the value of each glass management contract would be sufficient to cover the operating expenses of the [glass management contractor] concerned. He also sought explanation on how the levy level would be determined.  20180719  32. Dr Junius HO considered that the Administration should provide periodic progress reports on the implementation of GPRS to the Panel.  20181126  24. Dr Junius HO suggested that a performance indicator related to the realization of Hong Kong's solar energy potential in the coming four years should be set for the post of [Principal Assistant Secretary for the Environment (Electricity Reviews)].  20181126  58. Dr Junius HO also expressed concern that waste producers serviced by those [private waste contractors] might evade the payment of gate fee.  20181219  22. Dr Junius HO enquired about the progress of the trial of single-deck electric franchised buses and considered that a target should be set for the number of electric franchised buses to be used in Hong Kong. In addition, he and Dr Elizabeth QUAT suggested that the Administration should launch new initiatives expeditiously to encourage franchised buse companies to test out more electric bus models.  20181219  20. Dr Junius HO suggested that, pending the maturity of the double deck electric bus technologies, franchised bus companies might use more single-deck electric buses in place of double-deck diesel buses at this stage for the benefit of better roadside air quality.  20181219  55. Mr Tony TSE, Dr Junius HO and Ir Dr LO Wai-kwok asked whether the Administration would collaborate with the Guangdong authorities					
compliances, and require routine cleaning of MVAC systems by the relevant premises owners/management.  20180719 4. Dr Junius HO expressed support for the implementation of [the producer responsibility scheme on glass beverage containers] but queried the profitability of waste glass recycling businesses and whether the value of each glass management contract would be sufficient to cover the operating expenses of the [glass management contractor] concerned. He also sought explanation on how the levy level would be determined.  20180719 32. Dr Junius HO considered that the Administration should provide periodic progress reports on the implementation of GPRS to the Panel.  20181126 24. Dr Junius HO suggested that a performance indicator related to the realization of Hong Kong's solar energy potential in the coming four years should be set for the post of [Principal Assistant Secretary for the Environment (Electricity Reviews)].  20181126 58. Dr Junius HO also expressed concern that waste producers serviced by those [private waste contractors] might evade the payment of gate fee.  20181219 22. Dr Junius HO enquired about the progress of the trial of single-deck electric franchised buses and considered that a target should be set for the number of electric franchised buses to be used in Hong Kong. In addition, he and Dr Elizabeth QUAT suggested that the Administration should launch new initiatives expeditiously to encourage franchised bus companies to test out more electric bus models.  20181219 26. Dr Junius HO suggested that, pending the maturity of the double deck electric bus technologies, franchised bus companies might use more single-deck electric buses in place of double-deck diesel buses at this stage for the benefit of better roadside air quality.  20181219 55. Mr Tony TSE, Dr Junius HO and Ir Dr LO Wai-kwok asked whether the Administration would collaborate with the		basic set of IAQ standards through legislative means, conduct			
by the relevant premises owners/management.  20180719 4. 1101111 001
20190325 25. The Deputy Chairman asked whether the Administration Air
had, through the existing regional cooperation mechanism,
requested the Mainland authorities to tighten the emission
limit for PM2.5 in Guangdong in tandem with the review of
Hong Kong's AQOs.
20190325 38. Dr Priscilla LEUNG and <b>Dr Junius HO</b> expressed support for Water
the Administration's proposal [to improve water quality]. <b>Dr</b>
HO also asked about the measures for improving water
quality in coastal areas.
20190429 14. <b>Dr Junius HO</b> asked about the number of applications to Waste
the Recycling Fund that were rejected or withdrawn due to
land use restrictions. He suggested that EPD and/or RFAC
should strengthen coordination with LandsD and proactively
assist Recycling Fund applicants if necessary in applying for
waivers of lease conditions.
20190527 20. <b>Dr Junius HO</b> asked about the feasibility of laying chilled Climate
water distribution pipes of [district cooling system] when
rehabilitating ageing underground sewers in built-up areas.
20190527 53. <b>Dr Junius HO</b> and the Deputy Chairman asked about the Waste
Administration's plan to incorporate food waste/sewage
sludge co-digestion facilities, if any, in the proposed [Yuen
Long Effluent Polishing Plant], and the expected construction
cost of such facilities.
20190527 59. Dr Junius HO and Mr CHU Hoi-dick requested the Water
Administration to provide supplementary information on the
overall strategy and related measures for reducing polluted
discharges entering Deep Bay.
20191028 8. He and <b>Dr Junius HO</b> asked whether there were/would be <b>Air</b>
other incentive schemes for reducing emissions from

	[commercial vehicles].	
20191028	30. He and <b>Dr Junius HO</b> also sought information on the	Waste
	recycling outlets for and recycling rate of damaged/felled	
	trees arising from super typhoon Mangkhut in the previous	
	year.	
20191028	49. <b>Dr Junius HO</b> also enquired whether the Administration	Water
	would promote the installation of rainwater harvesting	
	systems on building rooftops.	
20191028	59. <b>Dr Junius HO</b> suggested that the Administration should	Air
	consider improving transport infrastructure in country parks	
	to increase their accessibility and promote green tourism. He	
	specifically suggested constructing a new road to enhance the	
	connection between Tai Mo Shan and the area around Pat	
	Heung, and providing park-and-ride facilities and more	
	parking spaces in some country parks.	
20191028	77. <b>Dr Junius HO</b> expressed concern about the potential	Climate
	difficulties in driving behavioural change towards energy	
20404246	conservation.	0.1
20191216	26. Mr SHIU Ka-fai and <b>Dr Junius HO</b> suggested that the	Air
	Administration should disseminate information on ambient	
	concentrations and major emission sources of dioxins, research findings on thermal decomposition of CS, etc., to	
	allay public concern about the environmental impact of tear	
	gas residues.	
20191216	45. Ms Elizabeth QUAT and <b>Dr Junius HO</b> considered that the	Air
20131210	Administration should take quicker actions to improve the	7
	environmental performance of public transport vehicles,	
	especially if the technologies and/or methods to be adopted	
	had been proven in other places; and a timetable should be	
	set for the replacement of diesel franchised buses with	
	electric buses. As the models of single-deck electric buses	
	tested out under a trial scheme were found to be unsuitable	
	for replacing conventional diesel buses in Hong Kong, <b>Dr HO</b>	
	asked about the way forward regarding the adoption of	
	electric buses. He suggested that the problem of reduced bus	
	availability arising from the switch to electric buses might be	
	overcome by reserving more standby buses to cope with	
	contingencies.	

20202122	24 5 1 1 110 1 111 1 1 1 1 1 1 1 1 1 1 1 1		
20200122	31. <b>Dr Junius HO</b> opined that performance targets should be	Air	
	set for the pilot schemes for e-PLBs and electric ferries in		
	order to ensure prudent use of public resources. He asked		
	whether the Administration had formulated a road map and		
	relevant targets for further reducing air pollutant emissions		
	from public transport through the adoption of green		
	transport technologies. He was especially concerned that		
	Hong Kong lagged far behind Shenzhen in the use of electric		
	buses.		
20200122	53. <b>Dr Junius HO</b> asked about the estimated amount of	Misc	
	funding to be sought for setting up the proposed Green Tech		
	Fund; and how the Administration would avoid duplication of		
	resources, given that the funding scope of Green Tech Fund		
	might overlap with those of other funds, such as the		
	Innovation and Technology Fund ("ITF"). In connection with		
	the above, he suggested that the Administration give		
	members an overview of all active funds that supported R&D		
	activities relating to green technologies, and how such funds		
	differed from each other in terms of positioning.		
20200122	56. <b>Dr Junius HO</b> said that the major issues raised by the	Air	
	deputations and individuals covered the following areas: (a)		
	setting a target for phasing out conventional vehicles		
	powered by fossil fuels; (b) enhancing the charging facilities		
	and other ancillary facilities for EVs; (c) support for the		
	recycling of waste EV batteries; (d) promoting R&D of EV		
	technologies so that there would be more choices of relevant		
	products that could meet local needs; and (e) the standards		
	for artificial sound alerting systems to be installed on EVs to		
	ensure the safety of visually-impaired pedestrians.		
20200122	62. <b>Dr Junius HO</b> said that the number of newly registered e-	Air	
	PCs after the launch of the "One-for-One Replacement"		
	Scheme had remained relatively insignificant compared with		
	the total number of PCs in Hong Kong. If a target for phasing		
	out conventional vehicles would be set for, say, 2040, much		
	more work would need to be done to promote the adoption		
	of EVs. He enquired how the Administration would boost		
	public confidence with a view to achieving much wider use of		
	EVs.		
	more work would need to be done to promote the adoption of EVs. He enquired how the Administration would boost public confidence with a view to achieving much wider use of		

20200427	11. Mr Tony TSE and <b>Dr Junius HO</b> considered it imperative	Misc
	for the Administration to set targets and implementation	
	timetables for the projects on enhancing the recreation and	
	education potential of country parks in line with the four	
	enhancement proposals, with a view to ensuring their timely	
	and effective implementation.	
20200427	23. <b>Dr Junius HO</b> expressed concern that the enhancement	Misc
	proposals under discussion did not cover the upgrading of	
	infrastructure in country parks, in particular transport	
	infrastructure. In this connection, he suggested that:	
	(a) some existing roads in country parks be widened and new	
	roads be built to increase the carrying capacities of country	
	parks and enable quicker hill fire response;	
	(b) a park-and-ride system be introduced for some country	
	parks so that people with special needs could visit them more	
	conveniently. Such a system might comprise a large-scale	
	underground car park near a country park, and a fleet of small	
	environmentally-friendly vehicles for public use within the	
	country park;	
	(c) a new road be built to enhance the connection between	
	Tai Mo Shan and the area around Lam Tsuen in Tai Po; and	
	(d) guided tour services in country parks be expanded for	
	attracting more visitors and creating job opportunities.	

Bills Committee on Protection of Endangered Species of Animals and Plants (Amendment) Bill 2017

20171017	1.	While expressing support for the Bill in principle, <b>Dr HO</b> expressed
		concern that:
		(a) a total ban on ivory trade was in effect tantamount to a de facto
		expropriation of the ivory stock held by the legitimate traders,
		having regard to the court ruling in the case of Fine Tower
		Associates Ltd v Town Planning Board; and
		(b) the ivory traders should be given an option to surrender their
		existing legal ivory stock to the Government within a specified
		period, say until end of June 2018, in return for compensation
		calculated according to market prices.
	2.	Dr HO's enquiry and ALA5's response regarding the proposing of
		Committee stage amendments ("CSAs"). <b>Dr HO</b> said he might

		propose CSAs to provide for a compensation arrangement regarding current ivory stock covered by PL in Schedule 4 of the Bill.
20171108	4.	Mr TO and <b>Dr HO</b> expressed concern about the possible effect of the Bill of limiting the property right of the ivory traders/practitioners without compensation. They sought ALA's comments on the Administration's view that the legislative proposal set out in the Bill was in conformity with Articles 6 and 105 of the Basic Law ("BL") on protection of the right of private ownership of property. <b>Dr HO</b> 's remark that his earlier proposal to move Committee Stage amendments to the Bill to provide for a compensation arrangement would have charging effect on Government expenditure. In this connection, he would not proceed with the proposed amendment.

Bills Committee on Waste Disposal (Charging for Municipal Solid Waste) (Amendment) Bill 2018

20190107	1.	<b>Dr HO</b> suggested that the Administration should:
		(a) engage the private sector and non-governmental organizations
		("NGOs") in promoting reuse and recycling through tripartite
		efforts;
		(b) expand the functions of RCPs to facilitate recycling, and invite
		NGOs to participate in relevant pilot schemes; and
		(c) expeditiously enhance the design and management of village-
		type RCPs to complement the implementation of the proposed
		charging scheme.
20200421	2.	Dr HO expressed concerns about the impact arising from the
		situation of HC's chairmanship election on the legislative process
		of the Bill. Discussion on whether the proposed fixed penalty of
		\$1,500 for offences relating to the depositing and delivery of non-
		compliant waste would have sufficient deterrent effect.

Subcommittee on Promotion of Recycling and Proper Disposal (Electrical Equipment and Electronic Equipment) (Amendment) Ordinance 2016 (Commencement) Notice 2017 and Product Eco-Responsibility (Regulated Electrical Equipment) Regulation

20170516	1.	Mr CHAN and <b>Dr HO</b> 's enquiries on the legislative timetable of the
		Commencement Notice.

	2.	<b>Dr HO</b> requested the Administration to provide a summary of the views of the Advisory Council on the Environment in relation to the REE Regulation and the licensing control for disposal of e-waste.
		Legislative timetable, and arrangements for (a) seeking extension
		of the scrutiny period of the Commencement Notice, and (b)
		invitation of public views
20170523	3.	Dr HO's suggestions on:
		(a) deferring the commencement of the new licensing control;
		(b) strengthening interdepartmental coordination to expedite
		approval of e-waste disposal licence applications; and
		(c) ensuring a level playing field in the e-waste recycling market.
