Panel	1	0	1

Comments Made in Environmental-related Committees:

Panel on Environmental Affairs

20170429	32. Mr Paul TSE said that it was indeed difficult to balance the trilemma of ensuring reliability, environmental performance and affordability on the power supply in Hong Kong. He appreciated the efforts of the Government and the two power companies in reaching the new SCAs with new initiatives. However, he doubted if the measure for controlling excess generating capacity would become a disincentive for the power companies to promote energy saving, as the latter would probably lower the electricity demand and hence making the power companies more likely to have excess generating capacity.
